

DEBAT LES SUPERILLES A L'EIXAMPLE

**Andreu Ulied,
Dr. Eng. CCiP MCRIT S.L.**

Barcelona, 3 Juliol 2014

Vivim un període de canvi en relació al **trànsit urbà**:

- Noves tecnologies
- Nous valors/comportaments socials
- ...velles polítiques i projectes urbans es fan més evidents!

Noves tecnologies aplicades a la mobilitat...

...noves possibilitats/modes “híbrids” de transport urbà?

Nous valors/comportaments socials...

...demanda creixent de millorar l'habitat urbà / espai públic?

“Velles” polítiques de trànsit urbà és fan evidents...

C. Buchanan (27 November 1963)

Cars are a boom. But they have now started to choke movement and, indeed, to threaten the quality of urban life. Buchanan offers two main ideas for re-planning towns.

- *First, main traffic should be canalised into a "primary road network".*
- *Secondly, the rest of the town should, be planned as "environmental areas"*
- *Third, in the larger towns, public transport is important.*
- *Fourth, planning of traffic and planning of land use must go together.*

... “xarxes de vies jerarquitzades” i “zones sense trànsit de pas”

NOU MODUL DE 400 X 400 MTS.

It's a promise!

After saving their money...
and saving their home...
they'll have time to make
the promise.

But after their home is
paid off, they can afford
time to do what they
want to do... time to
travel, time to go
camping, time to
enjoy the outdoors.

Moving millions of Americans
each year to greater freedom
in the marketplace of homes...
that's progress!

They will have more choices,
more opportunities living with new
communities, with new communities,
new opportunities to make over what they've
got... opportunities for progress.
